---

## Personal statement

I am a passionate and skilled designer with a good eye for detail and broad technical knowledge. I am able to take on any project with a professional, enthusiastic attitude, and always with a smile. I have learnt a lot over the past few years by always trying to better myself, and I intend to continue doing this while learning valuable new skills along the way.

As well as my full time employment I regularly take on personal projects to build my skills in areas not always covered by agency-based positions. When I'm not brushing up on my professional skills I enjoy keeping fit, running, cycling and swimming while trying to squeeze in at least one snowboarding holiday a year.
